

Aaron Wunderlin joined Discovery Farms as a Research Specialist. He grew up on a Wisconsin dairy farm that has been in his family since 1854. Aaron received a BS in biology from UW-Platteville and an MS in environmental science and policy from UW-Green Bay.

Aaron has many years of research and data collecting experience. Besides a thesis looking at streams in Wisconsin's national forest, he has worked on trout streams in southwest Wisconsin, wolves in Yellowstone National Park and black bears in northern Wisconsin.

Aaron likes spending his time outdoors. He enjoys hunting, fishing, camping and hiking. He also likes traveling, usually in the form of a camping trip. He has a wife and two children and lives near Green Bay, Wisconsin. He will be working out of the Discovery Farms Manitowoc office.
